

Sajjad Haider

Address: Rasheedabad,
Multan.

Cell# +923337379195

EMail: sajjadhaider1016@gmail.com

❖ Objective

BS Artificial Intelligence student and AI & Full-Stack Developer with hands-on experience building AI-powered applications, AI agents, automation systems, and modern web applications. Skilled in JavaScript, Python, Node.js, Next.js, AI API integration, and digital marketing. Passionate about developing practical AI solutions that solve real-world problems.

❖ Experience

Digital Marketing & Virtual Assistant (4+ Years)

- Managed Meta Ads campaigns using Business Suite and Ads Manager.
- Performed audience targeting, retargeting, campaign optimization, and conversion tracking.
- Implemented Meta Pixel and monitored campaign performance.
- Prepared reports and supported online marketing operations.

AI & Full-Stack Developer

- Built and deployed AI-powered web applications and intelligent assistants.
- Developed AI agents and integrated LLM APIs into production-ready solutions.
- Created full-stack applications using JavaScript, Node.js, Express.js, Next.js, and PostgreSQL.
- Worked on responsive user interfaces, backend systems, APIs, and deployment workflows.

Graphic Designer & Video Editor (4+ Years)

- Designed social media graphics, branding materials, banners, and promotional content.
- Edited professional videos for digital platforms.
- Utilized Adobe Photoshop, Premiere Pro, and After Effects for creative projects.

Co-Founder – China Vibes

- Contributed to digital marketing, online brand growth, and business operations.
- Supported customer engagement and product promotion activities.

❖ PROJECTS

1. BZU AI Assistant

- AI-powered university assistant that helps students access university information through chat, OCR, document processing, and voice interaction.
- **Technologies:** Node.js, Express.js, JavaScript, Groq AI, OCR, Voice Recognition.

Project Link: <https://bzu-ai-assistant-production.up.railway.app/>

2. DocEdit

- Collaborative document editor featuring document creation, editing, sharing, and autosave functionality.
- Technologies: Next.js, TypeScript, PostgreSQL, Tailwind CSS, TipTap.

GitHub: <https://github.com/sajjadhaider1016-dot/docedit-submission>

3. Customer Support AI

- AI-powered support agent that analyzes customer queries, detects sentiment, and generates structured responses.
 - Technologies: Python, Grok API, AI/LLM Integration.
- GitHub: <https://github.com/sajjadhaider1016-dot/Customer-Support-AI-Grok>

4. Recoveriest

- Platform designed to assist users with social media account recovery requests and support workflows.
- Technologies: Next.js, TypeScript, Tailwind CSS, Framer Motion, Resend API.

Live Website: <https://recoveriest-app.vercel.app/>

GitHub: <https://github.com/sajjadhaider1016-dot/recoveriest>

5. ContentPilot AI

- AI-powered content and marketing assistant designed to generate different types of marketing and social media content.
- It can be used for social media posts, captions, blog content, marketing emails, advertisements and other content formats.
- Technologies: Python, Flask, Groq API, Llama, HTML, CSS, JavaScript.

GitHub: [sajjadhaider1016-dot/ContentPilot-AI](https://github.com/sajjadhaider1016-dot/ContentPilot-AI)

6. ResearchPilot AI

- AI-powered research and document intelligence project designed to analyze research material and provide structured findings, recommendations and research insights.
- Technologies: Python, AI/LLM integration, Google Gemini API.
